Service Bulletin 001-90

Subject: Lancair 320 nose wheel style

Date: 10-23-90

1. All Lancair 320's must use the newer style nose wheel as manufactured by Matco Inc. Early model 320 kits which had the early style (spoke) nose wheel should be replaced with the newer unit.
2. In case your kit has not yet been updated, please return your spoked nose wheel and we will replace it with the newer model at no charge to you.
3. The oleo strut (for model 320 and the modified unit which fits the Lancair 235's as a retro fit) is NOT compatible with the early style (spoke) wheel.
4. The spoke wheel IS compatible with the model 235 installation.

Fig 1.

## EARLY STYLE NOSE WHEEL

These should be returned if you have a Lancair 320 kit or are using the retrofitable oleo style strut on your Lancair 235.
